TECHNOLOGIES USED

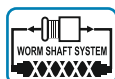

AIR BAIL - hollow, lightweight bail of the line laying mechanism

SUPER SLOW OSCILLATION - ultra-slow spool movement system

QUICK DRAG - system for quick adjustment of the drag

WORM SHAFT - kinematic scheme using a worm shaft

AIR ROTOR - a system using a special design of a lightweight and balanced rotor

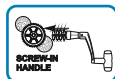

ANTITWIST ROLLER - line laying mechanism that prevents line twisting

POWER GEAR - system for increasing power and winding power

ARC LIGHT SPOOL - lightweight spool with a beveled collar, which increases casting distance

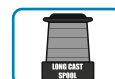

SCREW IN THE HANDLE - screw-in handle

X-SHIP - increased reliability and durability of the mechanism due to the location of bearings in the main gearbox

SIMPLE & AVAILABLE - simple and reliable reel

LONG CAST SPOOL - a special spool shape designed for extreme-range casting

HYBRID BODY - combined, hybrid body. Aluminum + Carbon

POWER HANDLE - reinforced design and enlarged reel handle arm

HIGH RELIABILITY - high reliability and practicality

WIDE CHOICE - wide selection of spool models and sizes

LIGHTWEIGHT knob - lightweight, high-tech knob

SUPER LIGHT CARBON HANDLE - reel handle made of high-strength and lightweight carbon fiber

SUPER LIGHT CARBON ROTOR - the reel rotor is made of high-strength and lightweight carbon fiber

SUPER LIGHT CARBON BODY - reel body made of high-strength and lightweight carbon fiber

NAUTILUS

TWIN FORCE HD

TWIN FORCE PG **NEW**

Nautilus Twin Force HD - high-quality spinning reels. The kinematic design with a worm shaft ensures perfect line laying. The screw-in handle and bearing in the line roller are a distinctive feature of modern high-end models. The improved geometry of the main gear and the rigid graphite body ensure quiet and easy operation of the mechanism. The range of reels is aimed at jig fishing, twitching large hard lures, and sea fishing.

Nautilus Twin Force PG is a continuation of the Twin force reel line from Nautilus. Having retained all the advantages of Twin force HD in kinematics, technologies and materials used, PG-type reels have become even more powerful and higher-torque. Available in two sizes 3500 and 4000. The applied gear ratio of 4.5:1 provides an ideal ratio of reliability and power when fishing with classic jigs with heavy rigs, and also goes well with powerful rods for Swimplures and Biglures.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
3500	6+1	5.2: 1	1.5/250	0.28/150	300
4000	6+1	5.2: 1	2.0/300	0.30/200	305

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
3500	6+1	4.5: 1	1.5/250	0.28/150	300
4000	6+1	4.5: 1	2.0/300	0.30/200	305

ARTA

Nautilus Arta is the best line of spinning reels in the Nautilus range. The series is available in four sizes, including a small spool version 2500S. It has a full range of technical solutions and qualities inherent in its own high class and level.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
2500	6+1	5.3: 1	1.2/150	0.20/140 0.22/120	255
2500S	6+1	5.3: 1	0.6/150	0.14/140 0.22/120	260
3000	6+1	5.3: 1	1.5/150	0.22/140 0.25/115	260
4000	6+1	5.3: 1	1.5/170	0.25/130 0.29/110	270

ARTA CP

Nautilus Arta CP is a popular and logical addition to the Arta line. The reel is available in size 4000 and is distinguished by its reduced gear ratio and its stylish, individual design.

The gear ratio of 4.8:1 provides increased winding power of the reel, and at the same time allows you to quickly retrieve line when shore fishing, or when twitching. These models are perfect for shore and boat jig fishing and twitching large hard lures.

Size	Bearings	Gear ratio	Line capacity PE/m	Weight, g
4000	7+1	4.8: 1	0.15/170	200

NAUTILUS

AVIOR

YouTube

Nautilus Avior is a reel made in an aluminum body, which makes it even more reliable and durable. The use of metal as a housing material allows minimizing gaps and play in the mating parts, reducing extraneous noise and making the reel operation smooth and quiet. The screw-in handle eliminates play and transmits rotation directly to the main gear. A roller rotating on a bearing prevents the fishing line or braided line from twisting.

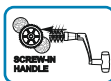

AVIOR CP

YouTube

Nautilus Avior CP is a popular and logical addition to the line of Avior reels. They are distinguished by a reduced gear ratio of the mechanism and their stylish, individual design. The gear ratio of 4.8:1 provides increased winding power of the reel, and at the same time allows you to quickly retrieve line when shore fishing, or when twitching. These models are perfect for shore and boat jig fishing and twitching large hard lures.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
2500	5+1	5.3: 1	1.2/150	0.20/140 0.22/120	250
3000	5+1	5.3: 1	1.5/150	0.22/140 0.25/115	255
4000	5+1	5.3: 1	1.5/170	0.25/130 0.285/110	260

Size	Bearings	Gear ratio	Line capacity PE/m	Weight, g
4000	5+1	4.8: 1	1.5/170	200

AVIOR PG

Nautilus Avior PG is a popular and logical addition to the Avior reel lines. The reels are available in size 4000 and are distinguished by their reduced gear ratio and their stylish, individual design. The gear ratio of 4.3:1 provides increased winding power of the reel, and at the same time allows you to quickly retrieve line when shore fishing, or when twitching. These models are perfect for shore and boat jig fishing and twitching large hard lures.

XEPTOR

Nautilus Xeptor is a series of high-level spinning reels. The materials and technologies used made it possible to achieve easy and smooth operation of the mechanism. Also, during development, we paid great attention to the reliability and 'indestructibility' of the reels, their durability and strength.

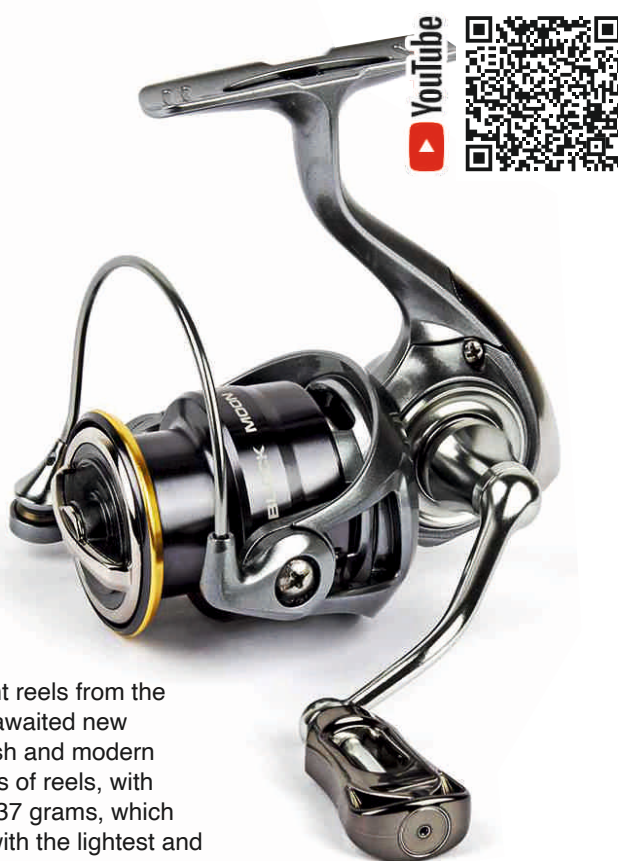

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
1000	7+1	5.1: 1	0.15/180 0.18/140 0.20/120	205

Size	Bearings	Gear ratio	Line capacity PE/m	Weight, g
4000	5+1	4.3: 1	1.5/170	265

NAUTILUS

BLACK MOON NEW

Black Moon is a line of ultra-light reels from the Nautilus brand. The most long-awaited new product of 2024. The most stylish and modern design. The line includes 3 sizes of reels, with ultra-low weights of 132, 135, 137 grams, which makes it possible to use them with the lightest and premium rods of the highest level.

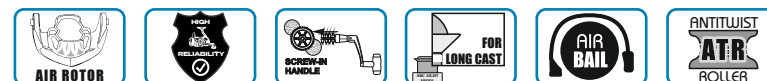

ZOLIX NEW

Zolix is a super stylish spinning reel from Nautilus. It stands out for its interesting, modern design and new technical solutions. The Antireverse system is made in a modern concept, without a reverse switching flag, which allows you to achieve maximum reliability when fishing in harsh, winter conditions and subzero temperatures. A wide range of models makes it possible to choose a reel for any rod casting weight.

Size	Bearings	Gear ratio	Line capacity PE/m	Weight, g
1000	7+1	5.2: 1	0.8# - 120	132
1500	7+1	5.2: 1	1.2# - 120	135
2000	7+1	5.2: 1	1.5# - 120	137

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
1000	5+1	5.2: 1	0.17/130 0.19/110 0.24/90	220
2000	5+1	5.2: 1	0.17/150 0.19/130 0.24/105	210
2500	5+1	5.2: 1	0.19/150 0.24/130 0.28/115	240
3000	5+1	5.2: 1	0.19/200 0.24/160 0.28/145	250
4000	5+1	5.2: 1	0.25/200 0.35/150 0.40/125	320

VINZA NEW

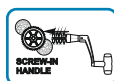

Vinza is a new product for 2024 in the Nautilus lineup. High-quality and reliable reels, in addition to a stylish design, have all the necessary technical characteristics of modern spinning models. A proven and reliable kinematic scheme in combination with a line laying roller made using Anti-Twist technology ensures high-quality laying of the braid or fishing line. A handle screwed into the main gear helps reduce backlash and makes the reel's operation even more comfortable and silent.

INVENT NEW

Invent is a new model of spinning reels from Nautilus. New for the 2024 season. Thanks to the excellent combination of advanced technologies and the use of modern rigs, it was possible to achieve optimal technical characteristics combined with an affordable price. It has a screw-in handle and a closed bearing in the line roller. Presented in the five most popular and sought-after sizes, ensuring the widest possible use of this model.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
1000	5+1	5.2: 1	0.17/130 0.19/110 0.24/90	220

NAUTILUS

ATOLL NEW

SLAIT

Atoll is a line of technologically advanced and modern spinning reels from Nautilus. A wide range of models, combined with excellent technical characteristics, makes this model the most in demand and popular when choosing a set for various types of fishing.

Nautilus Slait is a new product in the Nautilus range. Thanks to modern technical solutions and the materials used, it runs smoothly and quietly. The body of the model is made of graphite material. It has sufficient strength and reliability. Classic size range for selecting modern spinning outfits.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
1000	7+1	5.2: 1	0.15/260 0.20/150	220
2000	7+1	5.2: 1	0.20/270 0.25/180	250

4000	5+1	4.6: 1	1.5/170	0.14/260 0.16/240	255

LUX

Lux is a new spinning reel for the 2024 season. In addition to design solutions, a number of modern trends are used in the reels, including a reduced gear ratio of 4.6:1 and a modified version of the overoperation drag, without a reverse stop flag. Thanks to such technical solutions, the reels have increased traction, which is indispensable for jig fishing, and reliable operation of the overoperation drag in winter spinning fishing conditions.

DELLA

Della is a new product in the range of spinning reels from Nautilus. Thanks to modern technical solutions and the materials used, it runs smoothly and quietly. The optimally selected arrangement of 4 bearings on the main gear contributes to its reliable operation, and the bearing in the line roller prevents the line or braid from twisting. The reduced gear ratio of 4.6:1 allows you to use these reels when fishing with classic jigs, as well as with high-resistance spinners and hard lures.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
2000	4+1	4.6: 1	0.4/150	0.14/150 0.16/180	235
2500	4+1	4.6: 1	1.2/150	0.20/140 0.22/120	240
3000	4+1	4.6: 1	1.5/170	0.22/140 0.25/115	260

4000	5+1	4.6: 1	1.5/200	0.16/270 0.18/250	255

NAUTILUS

PARADOX

Nautilus Paradox is a popular and in demand line of reels. The body of the model is made of graphite material. It has sufficient strength and reliability. Classic size range for selecting modern spinning outfits.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
2000	2+1	5.2: 1	0.20/250 0.23/190	235
2500	2+1	5.2: 1	0.22/180 0.25/160	255
3000	2+1	5.2: 1	0.25/250 0.30/180	245
4000	2+1	5.2: 1	0.25/320 0.30/230	250

FIRE

Nautilus Fire - has absorbed all the advantages of the best models of spinning reels, their beauty and functionality. The screw-in handle, bearing in the line roller and impeccable operation combine perfectly with a very affordable price.

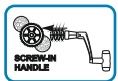

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
2000	6+1	5.1: 1	0.141/180 0.162/160	255
2500	6+1	5.1: 1	0.205/140 0.221/120	280
3000	6+1	5.1: 1	0.221/140 0.247/115	295
4000	6+1	5.1: 1	0.285/200 0.305/180	270

GREY

Gray - in the 2024 season, Nautilus introduces a new range of reels, consisting of four sizes of the spinning direction and one feeder model. All feature a lightweight screw-in handle, machined aluminum spool and hollow line guide. A well-thought-out arrangement of bearings implies their installation in the most necessary places and structural elements, including the knob, spool and line roller.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
2000	7+1	5.3: 1	0.6/150	0.14/160 0.16/140	210
2500	7+1	5.3: 1	1.2/150	0.20/140 0.22/120	270
3000	7+1	5.3: 1	1.5/150	0.22/140 0.25/115	280
4000	7+1	5.3: 1	1.5/170	0.25/130 0.285/90	285

I'ZI

I'zi is a line of stylish, lightweight and modern reels from Nautilus. A distinctive feature of this series is the gear ratio of the mechanism 4.6:1. A lightweight carbon handle and knob make it easier to start the reel when rotating, and a bearing in the line roller ensures its reliable operation and prevents this unit from jamming.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
2000PG	6+1	4.6: 1	0.14/200 0.16/180 0.18/150	200
2000PGS	6+1	4.6: 1	0.14/150 0.16/130 0.18/100	204

Fukuru is a new reel for the 2024 season from Nautilus. A series of super-light reels, suitable for the lightest rods, UL class. The model range includes two sizes 2000S and 2000SS, designed for the use of very fine braided lines and monofilaments. The design of the reel mechanism implements all modern trends and takes into account as much as possible the wishes of lure anglers: an 'air' rotor with easy start, bearings in the knob and line roller, a screw-in handle and much more.

Mark pro is a line of lightweight reels from Nautilus. Available in two sizes: 2000 and 2000S. This ensures their wide range of uses and applications. The reel body is made of lightweight and durable carbon fiber, and six high-quality bearings and a screw-in handle ensure comfortable operation without backlash or unnecessary sounds.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
2000S	5+1	5.4: 1	0.6/150	0.14/160 0.16/140	150
2000SS	5+1	5.4: 1	0.3/150	0.10/160 0.12/140	153

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
2000	6+1	5.1: 1	0.8/150	0.14/200 0.16/180	195
2000S	6+1	5.1: 1	0.4/150	0.14/150 0.16/130	200

LAND LM

Land LM is a new design for a popular and sought-after model. Ideally matches modern fishing rods and the general style of urban fishing.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
500	6+1	5.4: 1	0.4/150	0.14/150 0.16/120	170
800	6+1	5.4: 1	0.8/150	0.14/200 0.16/180	180

NAUTILUS

VERONA

ARGENT

Nautilus Verona - stylish and modern spinning reels. Affordable price and functionality. Wide range of sizes and possibilities of use with various fishing rods.

Nautilus Argent is a series of spinning reels with a wide range of models. The reels are distinguished by their easy and quiet operation. A reliable mechanism ensures smooth operation and high-quality winding of fishing line or braid. The model range allows you to choose your size for any spinning rod, and not only.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
1000	3+1	5.1: 1	0.15/180 0.18/140 0.20/120	195

CRONY

YouTube

Nautilus Crony - Classic shape and minimalist design, this is the overall style of the Nautilus Crony reels. A line of modern reels, with all the necessary characteristics. You can use these reels with spinning rods of varying power, from light rods for perch fishing to fairly powerful jig spinning rods for large rivers.

MARK

YouTube

Nautilus MARK - reels with a bright, attractive design, primarily designed for fishing with thin lines. They have a high-quality winding profile out of the box, a finely adjustable drag and a fairly low weight.

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g

NAUTILUS

MONSTER PIKE NEW

Monster Pike is a modern baitcasting reel from Nautilus. New for the 2025 season. Available in one size, for left hand. The powerful mechanism and aluminum frame of the body, together with 8 high-quality bearings, ensure quiet and smooth operation, high reliability and power. It has a magnetic braking system, which is extremely convenient to set up. The spool capacity allows the use of large diameter fluorocarbon and braided lines. The Monster Pike reel goes well with Nautilus rods of the same name for catching big fish.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
301	8+1	6.3: 1	0.37/130	260

EPICA HEAVY METHOD

Nautilus Epica Heavy Method is a high-level feeder reel with an excellent set of technical characteristics. Kinematic system "worm shaft", screw-in metal handle, slow spool feed system, bearing in the line roller. Excellent for equipping light carp or feeder rods when fishing in the "method" style. Thanks to the size of the spool and powerful mechanism, it allows you to make long casts and work with heavy feeders and rigs.

ADVENT PRO FEEDER

Nautilus Advent Pro Feeder is a feeder reel, the mechanism of which is made according to the "worm shaft" scheme. It is equipped with a lightweight metal handle that is screwed into the main gear. The bearing in the line roller is responsible for the flawless operation of this unit. Compatible with any feeder rods. It has proven itself excellent in sport fishing.

6000S	6+1	4.6: 1	0.255/180 0.285/150 0.300/130	370

VINZA FEEDER NEW

Vinza Feeder is a new model in the Vinza line of reels from Nautilus, made in feeder design. Available in two sizes: 6000 and 6000S. Suitable for using both thin braided lines and powerful monofilament. The 4.8:1 gear ratio allows for fast reeling from long distances while maintaining power when working with heavy rigs. The reel handle is screwed into the main gear, which reduces backlash. A plastic-backed clip protects thin braided lines from damage. The reel is optimal for feeder rods of the MH-XH class.

ZOLIX FEEDER NEW

Zolix Feeder is new for 2025, a powerful feeder reel available in sizes 6000 and 6000S. Equipped with an aluminum spool of increased diameter, a screw-in handle with an extended arm, a bearing in the line roller and a large clip with a plastic backing. Optimal for use with MH-XH class feeder rods.

      			
Size	Bearings	Gear ratio	Line capacity mm/m
6000	5+1	4.8: 1	0.20/420 0.25/270 0.30/95

LUX FEEDER NEW

Lux Feeder is new for 2025, a continuation of the Lux line from Nautilus. Powerful reel for MH-H class feeder rods with a gear ratio of 4.6:1, designed for working with heavy rigs. Equipped with an enlarged metal handle with an EVA knob, a safe clip that protects the braid or monofilament. Available in two sizes: 6000 and 6000S, suitable for different diameters of lines and braided lines.

Size	Bearings	Gear ratio	Line capacity mm/m
6000	6+1	4.6: 1	0.305/280 0.330/240 0.356/210
6000S	6+1	4.6: 1	0.255/200 0.285/170 0.305/150

ATOLL FEEDER NEW

Atoll feeder - feeder reels in the Atoll line. Maximum thought out and adapted for feeder fishing. They are distinguished by a reduced gear ratio of 4.6:1, for comfortable work with heavy rigs. Smooth and high-quality adjustment of the drag allows you to use very fine leashes. The model range allows you to choose the size of the spool for different diameters of fishing lines and braided lines used.

TANK BR NEW

Tank br - powerful, power reels from Nautilus. Made according to the kinematic scheme of operation of the mechanism with the Baitrunner system. Available in 2 sizes 6000 and 6000S and a classic design, most suitable for carp and feeder fishing. Despite the rather complex layout and a large number of additional elements of the mechanism, the reels are distinguished by their phenomenal reliability and trouble-free operation for your fishing trips.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
5000S	7+1	4.6: 1	0.20/260 0.25/165	375
5000	7+1	4.6: 1	0.25/310 0.30/215	375

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
6000	7+1	4.6: 1	0.25/350 0.30/240 0.35/170	480
6000S	7+1	4.6: 1	0.20/300 0.25/200 0.30/130	485

AVIOR FEEDER

The Avior Feeder 4000 and 6000 are the long-awaited and sought-after continuation in the popular and reliable Avior line of reels. These models combine all the advantages of the spinning line, and at the same time have the main characteristics of modern feeder reels: a reduced gear ratio of the mechanism, a shallow aluminium spool of increased diameter, a safe clip with protection from abrasion of the fishing line or braid, a bearing in the handle knob. Thanks to their technical and stylistic solutions, these reels are perfect for equipping feeder rods of any power class, regardless of their price.

KEPLER

Nautilus Kepler is a mid-price feeder reel, available in two sizes for different types of bottom fishing. Can be used with both braided line and monofilament. It is equipped with a screw-in handle, a lightweight aluminum spool, and a bearing in the line roller.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
4000S	5+1	4.3: 1	0.20/130 0.22/115 0.25/100	270
6000S	6+1	4.9: 1	0.22/180 0.25/150 0.29/120	395

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
5000S	7+1	4.6: 1	0.20/220 0.25/140 0.3/95	400
5000	7+1	4.6: 1	0.20/420 0.25/270 0.3/185	385

AURORA FEEDER

Nautilus Aurora Feeder is a modern feeder reel, 4000-thousand size. It has an increased spool diameter, a finely adjustable drag, and a convenient safe clip. Suitable for equipping Light and Medium class feeder rods. Due to its weight, it goes well with light quiver-tip rods.

AURORA MATCH

Nautilus Aurora Match is a match reel with a larger spool diameter and a higher gear ratio of 6.0:1. Made in a classic, modern design. It has a soft stroke, a comfortable turned handle with an ergonomic knob. The bearing in the line roller ensures reliable operation of the unit and prevents the line from twisting. The reel is designed for use with match Bolognese and feeder rods.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
4000	7+1	5.0: 1	0.20/220 0.25/160 0.30/130	315

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
4000HG	7+1	6.0: 1	0.20/220 0.25/160 0.30/130	315

GREY FEEDER

Gray Feeder - features a lightweight screw-in handle, machined aluminum spool and hollow line guide. A well-thought-out arrangement of bearings implies their installation in the most necessary places and structural elements, including the knob, spool and line roller. The Nautilus Gray feeder 6000S with a 4.7:1 gear ratio is designed for use with heavy feeder rigs.

ARGENT FEEDER

Nautilus Argent Feeder - feeder reels in sizes 5000 and 6000S. Classic design, powerful and reliable mechanism, and most importantly, affordable price, make them an indispensable companion. We recommend size 6000S for use with thin lines in the current, and size 5000 goes well with fishing line for method and classic carp fishing.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
6000S	7+1	4.7: 1	0.285/140 0.305/120 0.33/100	390

6000S	3+1	4.6: 1	0.20/180 0.22/150	395

NAUTILUS

N-FEED

Nautilus N-Feed is a feeder reel designed for use with heavy feeders and loads. The declared line capacity allows the use of both fairly powerful lines when fishing for carp in commercial fisheries, and thin braided lines with a minimal amount of backing. The kinematic design with six bearings ensures a smooth and soft ride. The lightweight rotor and handle are responsible for the easy start of the reel. The drag adjustment allow the use of fine hooklengths.

FORWARD FEEDER

Nautilus Forward Feeder is a modern, black and red style feeder reel with a wide range of necessary characteristics and capabilities. Thanks to the shape of the line roller, which rotates on a bearing, it does not injure or twist the line. Demonstrates high-quality winding of thin braided lines. Allows you to use heavy rigs and make long casts.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
6000S	6+1	5.1: 1	0.30/180 0.33/155 0.356/125	405

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
5500	6+1	5.1: 1	0.285/175 0.31/155 0.33/135	400

ZENON FEEDER

Nautilus Zenon Feeder - combines all the necessary qualities of modern feeder reels. The shallow Long cast spool allows you to fish at the longest distances. The reduced gear ratio adds even more power and gives the confident possibility of using heavy method, river and other feeders. And the Quick Drag system will allow you not to miss the trophy.

REZON FEEDER

Nautilus Rezon is a classic feeder reel, available in two parallel sizes. This gives a good opportunity to choose a set for certain fishing conditions, type of reservoir, and fishing style. The Nautilus Rezon 5500 model is designed for use with thin braided lines without backing. The Nautilus Rezon 6000 model is characterized by increased line capacity, for working with powerful lines when fishing for carp and grass carp using method rigs and standard carp rigs. The reduced gear ratio of 4.6:1 provides excellent winding power of the mechanism. Bearings in the line roller and knob add even more reliability and overall comfort during fishing.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
5000	5+1	4.4: 1	0.30/175 0.35/130 0.40/100	410
6000S	5+1	4.4: 1	0.23/200 0.28/150 0.30/175	420

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
5500	6+1	4.6: 1	0.22/180 0.247/150 0.285/120	370
6000	6+1	4.6: 1	0.285/200 0.30/180 0.33/160	365

NAUTILUS

DEKA FEEDER

Nautilus Deka is a new product in the 2024 line from the Nautilus brand. Classic feeder size, small-profile aluminum spool, safe clip that does not damage the fishing line or braid - these are the main and necessary characteristics of modern feeder reels. The reliable mechanism and 4.6:1 gear ratio guarantee increased winding power and comfort when working with heavy feeders.

DIGGER FEEDER

Nautilus Digger Feeder is a modern feeder reel from the Nautilus company. Available in size 6000. Due to the reinforced mechanism and increased spool diameter, excellent work with heavy rigs at long distances is ensured.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
5500	5+1	4.6: 1	0.22/180 0.25/150 0.285/120	360

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
6000	7+1	4.7: 1	0.28/300 0.30/250 0.35/200	390

ORKA FEEDER

Nautilus Orka Feeder - has an enlarged mechanism, a shallow, large-diameter spool, and a reduced gear ratio of 4.7:1.

TOTAL FEEDER

Nautilus Total Feeder is a budget reel for feeder fishing. It is made in a classic design, has a durable body and an ergonomic handle. The reel mechanism is characterized by a smooth operation, which is ensured by 4+1 bearings. It also has good traction. The Smooth Drag System allows you to precisely adjust the braking force. The mechanism is equipped with a reliable Tough Alloy Processing (TAP) main gear. There is also an instant anti-reverse.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g

NAUTILUS

EPICA CARP

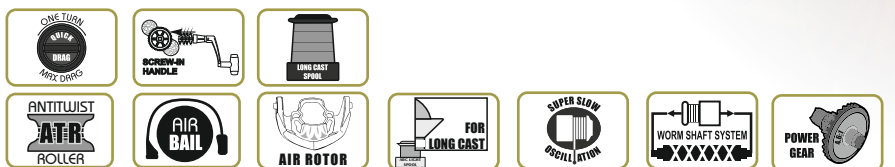

Nautilus Epica Carp is a series of carp reels of the highest level. Kinematic system "worm shaft", screw-in metal handle, slow spool feed system, bearing in the line roller. The reels are made in two versions, to equip working and spod rods. The increased gear ratio of the Epica Spod carp reel model ensures fast reeling of bait rocket or spomb even from the longest distances.

TOURNAMENT ELISIUM CARP

Tournament ELISIUM Carp is a top carp reel from Nautilus. 14+1 high-quality bearings ensure flawless operation of the mechanism. The powerful, strong handle and the increased size of the main gear can withstand maximum loads when playing trophy fish. The super-slow spool feed system, combined with its length, ensures extreme-range casting and flawless line laying. We offer these reels for both recreational and sport fishing.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
8000	9+1	4.1: 1	0.35/430 0.40/330 0.50/210	605
8000 spod	9+1	4.9: 1	0.20/300 0.25/200 0.30/150	610

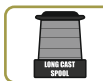

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
8000	14+1	4.9: 1	0.32/330 0.35/270 0.40/220	755

K10 NEW

K10 is a new line of carp reels from Nautilus. The K10 8000 model is optimally combined with relatively thin lines, allowing you to avoid the use of backing, and the K10 10000 model is aimed at maximum diameters, or a large amount of line, when fishing with bait boats. When designing the reel, the kinematic design of the Worm shaft system was used, which, together with an aluminum body and the X-Ship system, ensures ideal operation, high reliability and comfort while fishing.

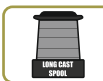

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
8000	9+1	4.4: 1	0.225/180 0.255/150 0.300/100	645
10000	9+1	4.4: 1	0.305/180 0.330/155 0.356/125	660

HARISMA NEW

Harisma is a universal carp reel with an optimal combination of technical characteristics and an affordable price. Available in 2 sizes and a classic carp design. This model implements the most modern and popular systems such as X-ship, Worm shaft system, Quick Drag Sistem, allowing for the most comfortable and convenient use of them while fishing.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
8000	9+1	4.4: 1	0.28/250	635
10000	9+1	4.4: 1	0.40/300	655

INVENT CARP CONQUEST

Invent Carp conquest - combines all the requirements for modern carp reels. A lightweight long cast spool in combination with the Worm shaft kinematic system ensures high-quality line winding and long-distance casting of rigs. Smooth operation, slow spool feed, fast drag and improved winding power put it on par with reels from the world's leading manufacturers.

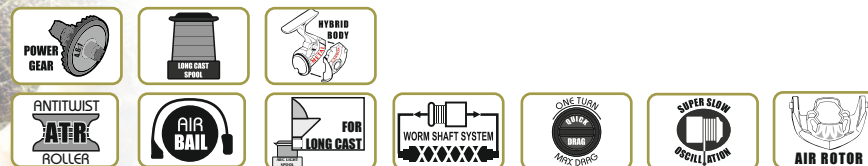

INVENT PRO

Nautilus Invent Pro is a logical update and development of the program of high-quality carp reels from Nautilus. In this model, we have collected and implemented the entire range of technical characteristics and qualities, and a modern approach to design and layout, plus two classic styles of execution, make it possible to assemble your own perfect set of rods and reels.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
8000	5+1	4.1: 1	0.30/560 0.35/410 0.40/320	640

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
B8000	6+1	4.1: 1	0.286/250	610
B10000	6+1	4.1: 1	0.30/450	600
N8000	6+1	4.1: 1	0.286/250	610
N10000	6+1	4.1: 1	0.30/450	600

INVENT PRO SPOD **NEW**

The Invent pro spod is a new addition to the Nautilus line of carp reels, specially designed for use with marker and spod rods. A distinctive feature is the high gear ratio of the mechanism, which allows you to retrieve 1.45 metres of fishing line or braided line per turn. The special shape of the spool and its increased diameter allow for maximum casting compared to conventional carp reels. Two line-safe clips make it possible to rebraid two distances while fishing.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
10000	6+1	5.7: 1	0.30/450	621

TOTAL CARP

Nautilus Total Carp - has all the characteristics of the older models. The increased diameter of the spool allows you to fish at long distances, and the Quick Drag system ensures quick adjustment of the drag after casting.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
7000	4+1	4.1: 1	0.25/300 0.28/240 0.30/205	620
8000	4+1	4.1: 1	0.28/350 0.30/300 0.35/250	600

ICE GAME BLACK

Ice Game is a baitcasting reel designed for vertical fishing from ice or a boat. It has a reliable and powerful mechanism, an instant anti-reverse and an adjustable free line release drag. Supplied with a lightweight aluminum spool. Pairs perfectly with modern, lightweight ice fishing rods. Designed for fishing in seriously negative temperatures, and will become an indispensable assistant when fishing for pike, pike-perch, trout and other predators.

LAND WINTER

Land winter is a continuation of the Land line, created specifically for ice fishing. The bright and visible color is easily visible on ice and snow. The absence of a reverse stop increases the reliability of the overoperation drag and ensures its reliable operation in severe frosts.

Size	Bearings	Gear ratio	Line capacity mm/m	Weight, g
600	3+1	2.8: 1	0.28/140 0.30/120	185

Size	Bearings	Gear ratio	Line capacity PE/m	Line capacity mm/m	Weight, g
800	6+1	5.4: 1	0.8/150	0.14/200 0.16/180 0.18/150	165

ICE KING NEW

Ice King is a high-tech inertial, baitcasting reel for ice fishing. Provides maximum comfort when fishing thanks to the bait's free-fall system, the speed of fall of which is controlled throughout the descent thanks to a magnetic system, which allows you to quickly fish all horizons. Nautilus Ice King is equipped with a finely adjustable drag with a maximum load of 4 kg. This allows you to confidently fight large fish, including at great depths. The handle is made of lightweight aluminum and equipped with ergonomic 'warm' EVA knobs. The reel is equipped with a high-capacity spool with optimal line capacity made of durable aluminum.

LiRA NEW

Lira is a multiplier inertial reel for ice fishing. Designed for fishing with vibration lures, rattlins, spoons and balancing lures. This reel is convenient thanks to the free-fall bait system, with magnetic speed control throughout the entire path, which allows you to effectively cover different depths. Nautilus Lira has a finely adjustable drag with a maximum load of 4 kg, which makes it possible to confidently play large fish even from great depths. The handle is made of lightweight aluminum and equipped with ergonomic EVA knobs. The reel is equipped with a high-capacity plastic spool with optimal line capacity.
